

Quality Policy

The management of Johnstons of Elgin will support the establishment of this policy to ensure that it reflects on the activity of the scope of our business. We will ensure that the policy is reviewed on a regular basis at least annually. We are aware that the context of our business and the need to consider our business environment especially in line with a combination of internal and external factors of legal and statutory requirements are an essential pre-requisite of our compliance.

In our Quality Manual we have set objectives and these will be considered as part of our review process at the Management Review and may be adjusted at this time or as deemed necessary by senior management. In addition at this Management Review as we would also discuss the aspects of continuing improvement. Actions will be recorded and followed up by the Quality Manager.

The policy will be available as part of the Quality Manual which is found on the server. It will also be displayed at various locations within the company on notice boards.
